

## July 2024 Regulation Board Meeting Summary

The Regulation Board met virtually. The CEO provided an update for the Board on a recent article on audiology in a Scottish national paper which had mentioned AHCS, and her further communications with the Professional Standards Authority and Chief Scientific Officers. The Board had chance to ask questions and to hear more about proposed next steps. The Registrar's report was discussed, noting new Fitness to Practice cases received and the upcoming CPD audit for Medical Illustrators and Audiologists. The Board approved the proposal to include those on PSA accredited register as certified documentary signatories. Reports were received from the LSI working group and from the Education and Training Committee. The latter brought to the attention of the Board the use of Artificial Intelligence (AI) within equivalence submissions and a proposed statement on this was later circulated to Regulation Board members. The Board received a presentation on how AHCS communicates with registrants and were able to discuss future ideas and plans. The Board noted that membership of the Regulation Board was under review, as it said goodbye to long-standing member Rob Farley and thanked him for all his contributions.
